Manufacturing

TARGET CONTACTS

IT Manager, IT Director, CIO, Systems Administrator, General Manager, Operations Manager, CFO, Head of Finance

THE CHALLENGE

Marketing in complex-sale verticals, such as IT and manufacturing, carries a special set of challenges. The conversion funnel is usually longer and nonlinear, and the process requires connecting with multiple decision-makers. That's on top of the relatively steep learning curve needed to understand and communicate what the product or service brings.

For the Client, these form the basic requirements when teaming up with third-party agencies that handle part of their marketing programs. The company combines inbound efforts (mainly done in-house) with outbound tactics (mostly outsourced to providers). Prospecting and lead generation are the activities that the Client typically delegates to an outside marketing company.

The Client recently decided to look for a new marketing partner as part of its renewed focus on Southeast Asia. The company needed an outbound agency with the scope to help it cover new segments in its target areas ((Indonesia, Malaysia, Myanmar, Philippines, Singapore, Thailand and Vietnam), as well as the scale to generate prospects from companies in its target industries.

More importantly, the Client wanted a lead generation company they could work with on a long-term basis. This would accelerate deployment of campaigns and keep the messaging more consistent.

HIGHLIGHTS

- Launched a long-term marketing partnership with one of Asia's biggest tech brands
- Helped the Client reach event turnout targets
- Handed off high-potential sales appointments

RESULTS WITHIN 12 MONTHS

204 Sales Appointments

96 Marketing-Qualified Leads

The Client reviewed proposals sent by Callbox and two other marketing agencies. All three had considerable experience managing companies' APAC campaigns, but Callbox was able to provide case studies and references showing projects with longer-term commitments. The Client placed a great deal of emphasis on this key differentiator and signed up with Callbox

Event Marketing

The project kicked off a month before a company-sponsored event. The Callbox team worked closely with the Client to put together an event marketing campaign aimed at boosting turnout:

1. The event revolved around driving awareness and generating leads for its SAP services and solutions.
2. The target attendees mainly consisted of decision-makers in IT, Operations, and Finance from Singapore-based manufacturing firms. The Client wanted to focus on companies not using SAP Business One.
3. Once Client approved the call list and campaign materials, Callbox then launched a one-month (22-day) event marketing campaign.

Appointment Setting

The project's next phases consist of different appointment setting campaigns. Each phase focused on a different ICT solution, target industry, and target area.

1. The project focused on booking appointments for its SAP ERP consulting and integration services. The campaign's targets were IT prospects from trading /distribution, medical devices, and discrete manufacturing companies in Singapore.
2. After that, the Callbox team carried out two simultaneous appointment setting campaigns. One campaign targeted Singapore, while the other focused on the Philippines. Both campaigns generated ICT infrastructure appointments from finance, legal, and healthcare companies.
3. The Client played an active role in refining each campaign's parameters and in crafting the campaign materials.

RESULTS

The project completed one Event Marketing and three Appointment Setting campaigns in 12 months.

The event marketing campaign generated a total of 24 confirmed attendees and 35 positive contacts, while the Appointment Setting campaign produced 204 Sales Qualified Leads and 96 Marketing Qualified Leads.
